## *With Us?*

### OFFERING NEW OPPORTUNITIES

We asked if you were with us as we launched a new young sire program and expanded our sampling program. The answer from 75 herds, so far, is a resounding YES! If you have not yet signed on, there is still room. Simply contact us for the details and learn how to save on costs, short-and long-term, while sampling the most elite bulls available. Have a pedigree you think is worthy of consideration in our program? Send it to us. We will give our candid opinion, and help you make an informed decision.

### GENOMICS...AN UPDATE

As most know, an international effort through Interbull is underway to produce genomic evaluations for Brown Swiss. This cooperative effort has over 3,000 bull genotypes from the U.S., Switzerland, Austria, Germany, Italy, France and Slovenia. Theoretically, this should produce results superior to what Jersey now enjoys and on a par with where Holsteins were just a short time ago. In the interim, AIPL-USDA is continuing to improve our own system, and we now have a routine bump in reliabilities of 12 to 16 percent for most production traits. While we still view the current system as a valuable tool in screening young animals on the farm, we recognize an increasing interest in using the most elite genomic bulls possible. In response, we have added a page to our catalog with a selection of the 'best of the best'. Besides the four featured Genomic Gems in this book, you can find all of our Sire in Waiting genomic results in the Proof section of our website or by contacting us.
